You're Hit!

Math Skill: Reinforce addition facts through 12.

Materials: Game Board
Two regular dice
10 markers per player (two different colors)

Players: Two

Procedure:

1. The players take turns throwing two dice, placing a chip on the snowball that shows the sum of the two numbers
2. If a player gets the same sum as the opponent, the opponent is HIT! The opponent's chip is replaced with that of the current player.
3. If a player rolls the same sum she rolled before, she places another chip on that number and that number becomes a "frozen snowball" and can not be bumped.
4. The owner of the "frozen snowball" can continue to place chips on that number.

The first person to be rid of all their chips is the winner!

VARIATIONS:

- Roll, add, and then multiply the sum by 3
- Roll, add, and then multiply the sum by 5
